Profile

I am a back-end developer based in Germany, currently building full-stack skills.

As a dedicated vegan since 2013, I am passionate about using technology to create a positive real-world impact - specifically by fighting to end animal exploitation.

I aspire to contribute my technical skills and supportive mindset to mission-driven projects and operational teams that make a tangible difference.

Education

Certified Python back-end developer,

DCI - Digital Career Institute 

05/2025 – 05/2026 | Online

Completed 1,930 units of intensive training in Python, Django, and PostgreSQL. Focused on Object-Oriented Programming, REST APIs, and database design within an Agile team environment.

Technical Skills

Python (OOP) | Django | PostgreSQL |
Django REST Framework | Git | Agile |
Unit Testing | HTML | CSS | Linux

Projects

The Glass Walls Project , *Work in progress*

Interactive map to track locations and violations of slaughterhouses using PostGIS and GeoDjango

The Leash You Can do , *Work in progress*
